

Report

Worksheet „TML_report“

In this Worksheet the user can summarize, print and save the results of the actual calculations and estimations. The report generator uses

The report accesses the entries and graphics in the remaining spreadsheets or in the current working directory, which is why it is necessary that the calculations have already been completed.

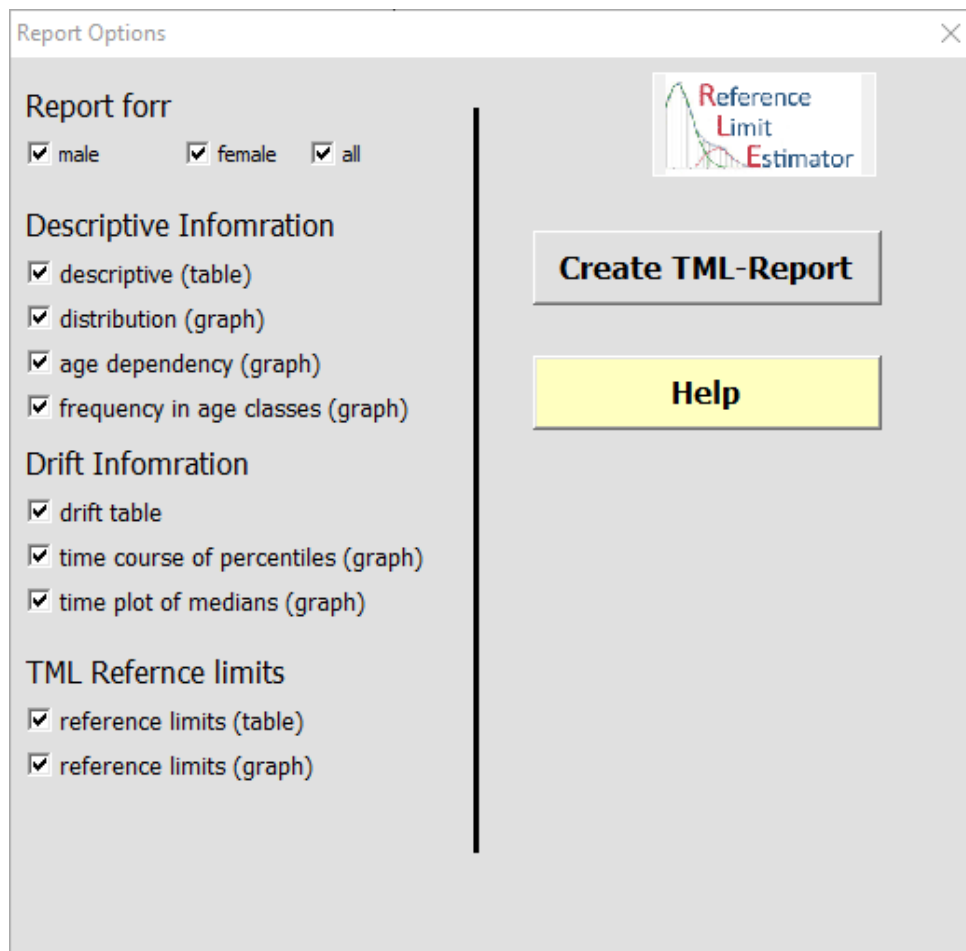

The report cannot currently report on the TMC algorithms.

Button „Create TML- report“

By pressing the button, the following window opens in which the components of the report to be created are compiled.

The selection options shown in the figure are activated by default. They can be changed at will.

Report

Section „Report for“

Hier wird ausgewählt, welche Unterstichprobe angezeigt wird (männlich, weiblich oder alle)

Section „Descriptive Information“

By selecting, the following information is inserted into the report:

descriptive table	table from worksheet „descriptive_table“
distribution (graph)	kernel density estimation from sheet „descriptive_graphs“
age dependency (graph)	age dependencies from sheet „descriptive_graphs“
frequency in age classes (graph)	frequency in age classes

Section „Drift informations“

drift table	complete table from sheet „drift_table“
time course of percentiles (graph)	Time course of percentiles from sheet „drift_graphs“
time plot of median (graph)	Time plot of median from sheet „drift_graphs“

Section „TML Reference limits

reference limits (table)	part of the table from sheet „RL_table“
reference limits (graph)	distribution graphics from sheet „RL_graphs“

There is another button on the form labeled “Show Report”. Pressing will create the report according to the options selected on the form.

Button „Layout View“

By pressing, the report is displayed as it can be printed on A4 paper. In order for details to be visible on the graphics, the format must have a minimum size. This often means that only one graphic is displayed per sheet.

Button „Print report“

This button prints the report on the standard printer. If printing is to be done on another printer, Excel's print function must be done with the appropriate printer settings.

Button „Save report“

This option allows the report to be saved in PDF format at a location to be specified. If desired, the PDF file will be displayed after saving.

Button „Help“
